PSG College of Technology,
Coimbatore.

Subject: Request for Custom Domain

Respected Mam,

We are writing to request permission to purchase a custom domain name for a website we are creating for The Eye, CSEA (cseatheeye.com) at an INR 791.24 for 1 year.

We believe that having a website with a custom domain name will be an important resource for the club, as it will allow us to share resources and updates with our members as well as other students regarding the events and other activities in a more organized manner.

We are requesting permission to use association funds to purchase the domain name for the website. Realizing the significance of the above request, we assure you that we would use the domain name responsibly. Kindly consider the request for your perusal.

We have readied and hosted the website at the URL http://theeye.intelix.in/.
Please find attached the screenshots for the same.

Thanking you
Yours sincerely,
Aaditya Rengarajan
(21Z202,SPOC - The Eye, CSEA)

Sunetha

ABOUT THE EYE

Who We Are

The Eye is a cybersecurity focus college club under the Computer Science and Engineering Association in PSG College of Technology. We have multiple verticals to help our members learn and practice cybersecurity in their every day life. We organize events in order to increase awareness of Cybersecurity within the college, and also perform other activities like research and documentation, secure coding and mock box attacks.

What We Do

The Eye has 7 Verticals under the club:

Oculus UI

Oculus UI is a secure coding project under the web development stream, simplifying the everyday club tasks within The Eye - for internal usage.

Bug Bounty Research

The Bug Bounty Research Team tries to mimic grey hat actors and identify vulnerabilities in the online assets of third party corporations that provide open bug bounty programmes.

Training

The Training Team consists of a few core members - who organize self assessment-based cybersecurity training programmes exclusive to the members of The Eye.

Events and Social Media

The Eye organizes cybersecurity-based events in order to spread awareness - like workshops, hackathons and treasure-hunts. The Events and Social Media team are responsible for ideating and conducting events, as well as handling the Social Media handles of The Eye.

Intel

The Intel Team develops cybersecurity solutions for proprietary use within The Eye based on Python and the NMap Scripting Language for already-available tools like Maltego, NMap and other custom tools created by The Eye.

Documentation

The Documentation Team is responsible for writing and creating articles, research-work, and more relevant document-related tasks.

OSINT

The OSINT (Open Source INTelligence) Team is responsible for contributing to already-existing open source intelligence projects to improve the world of Cybersecurity.
